Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for Page404.vue

Checker Input

Show ☐ source ☐ outline ☐ image report [Options…]

Check by [file upload ∨] [Choisir un fichier] Aucun fichier choisi

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

[Check]

Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.

[Message Filtering]

1. `Warning` **Consider adding a `lang` attribute to the `html` start tag to declare the language of this document.**

   From line 1, column 1; to line 1, column 10

   `<template>↵  <di`

   For further guidance, consult Declaring the overall language of a page and Choosing language tags.

   If the HTML checker has misidentified the language of this document, please file an issue report or send e-mail to report the problem.

2. `Error` **The character encoding was not declared. Proceeding using `windows-1252`.**

3. `Error` **Start tag seen without seeing a doctype first. Expected `<!DOCTYPE html>`.**

   From line 1, column 1; to line 1, column 10

   `<template>↵  <di`

4. `Info` **Trailing slash on void elements has no effect and interacts badly with unquoted attribute values.**

   From line 5, column 7; to line 8, column 8

   `re>↵      <img↵        src="../assets/images/erreur404.png"↵alt="image marrante d'une fille au cheveux rouge disant oups et montrant un 404 "↵        />↵        <`

5. `Error` **Attribute `scoped` not allowed on element `style` at this point.**

   From line 13, column 1; to line 13, column 14

   `emplate>↵↵<style scoped>↵.page`

   Attributes for element `style`:

   Global attributes

   `media` — Applicable media

   `blocking` — Whether the element is potentially render-blocking

   Also, the `title` attribute has special semantics on this element: CSS style sheet set name

6. `Error` **Element `head` is missing a required instance of child element `title`.**

   From line 27, column 1; to line 27, column 8

   `t: 500;↵}↵</style>`

   Content model for element `head`:

   If the document is an iframe srcdoc document or if title information is available from a higher-level protocol: Zero or more elements of metadata content, of which no more than one is a `title` element and no more than one is a `base` element.

   Otherwise: One or more elements of metadata content, of which exactly one is a `title` element and no more than one is a `base` element.

Document checking completed.

Used the HTML parser.

Total execution time 2 milliseconds.
